Navigating research on pharmaceutical care

PCNE Working Symposium 2022, Lisbon

WS3 - PCNE DRP-classification: a case of classification or validation cases?

Improving existing validation cases and establishing new cases for validation

February 11-12, 2022

Facilitators:

Ina Richling, Germany

Nejc Horvat, Slovenia

Tommy Westerlund, Sweden

Fa

Aim of workshop

- During validation rounds of the PCNE DRP classification, coding inconsistencies have originated both from unresolved classification issues and insufficiently defined validation cases
- Aims of previous DRP workshops have been to improve the classification
- Aim of current workshop was **to improve the content of existing validation cases and develop new ones**

Group work

- the whole group was divided into smaller equally numbered groups
- each group tried to develop or upgrade at least 3 cases in 1 h
 - the developed cases should cover all the sections in the PCNE DRP classification
 - Problems, Causes, Planned interventions, Acceptance of the interventions, Outcome
- the developers should know and agree on the coding they are aiming at

hard work was done

Results and future work

- 7 cases got upgraded
- 4 new cases were developed
- degree on codings were discussed with 2 cases
- future work
 - go through the results/proposals/comments and suggestions from the validation round and workshops with the members of the working group
