

WS4 – Grow in guideline implementation: from maturity matrix to indicators

Martina Teichert, Kenji Fujita

Navigating research on pharmaceutical care

WS4. Grow in guideline implementation: from maturity matrix to indicators

Kenji Fujita

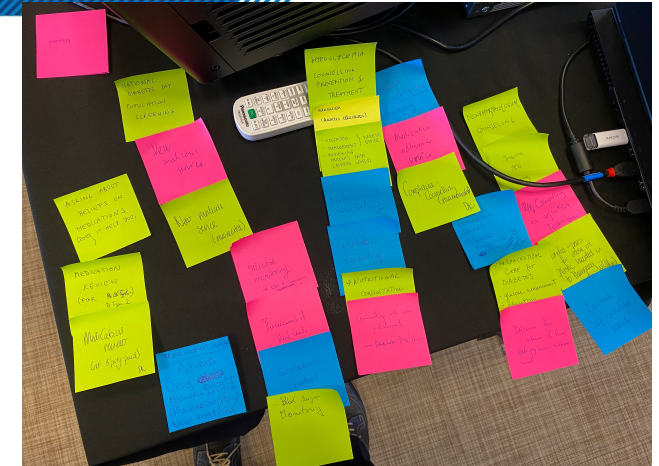

Martina Teichert

What we did and learned

Guideline

- What is guideline?
- Guideline development
- KNMP guideline for DM

Quality Indicator

- What is QIs?
- Pros and cons
- Users and aim

Maturity Matrix

- What is MM?
- How to use?
- Assess maturity

Germany

The Swiss Way

KNMP Maturity Matrix	Personalized care	Internal organisation & team work	Information systems & data exchange	Collaboration with external healthcare providers	Education & Research
Action within domain...	Individualized care and shared decision making	Task sharing, training, team meetings, work sharing and communication.	Patient file keeping and exchanging, medication surveillance	Cooperation with local and regional healthcare providers	Internships, providing lectures, participating in research, performing pharmacy practice research.
STEP 5 Innovating					
STEP 4 Evaluating & adapting					
STEP 3 Doing					
STEP 2 Being able to					
STEP 1 Aware and wanting to					

Handwritten notes on the table: "Data Exchange" and "low is the pride" under STEP 1; "University" and "France" on the right side.
